

HoopNest 3x3 — Quick start

From download to your first tip-off in about five minutes.

Set up once

1 Open the file

Double-click it. It runs in the browser you already have — nothing to install, no account, no internet needed after this point. On a phone, use the browser's *Add to Home Screen* so it opens like an app.

2 Look around with fake data (optional)

On the first run the app offers a sample squad with three finished games, so every screen has something in it. One tap in Settings removes it later.

3 Add your players

Roster → Add player. A number and a name is enough. A 3x3 squad is three on the floor plus one substitute, so four entries is a full team.

Every game

1 Start a game

Live game → Start a game. Opponent, date, and tap the three who start. The format, the target of 21 and the 12-second shot clock are already set.

2 Start the clock when the ball goes live

Press **Start clock**, or hit the space bar. The shot clock runs with it.

3 Tap the player, then tap what happened

That is the whole rhythm. The selected player turns orange. After a made basket the app offers a one-tap assist; skip it if there wasn't one.

4 Wrong tap? Undo

The big button above the pad. It says exactly what it will undo, and it goes back forty steps.

5 Finish

Press **Finish**. The game moves to the Games tab and every other screen updates.

The one habit that matters

After a tournament day, open **Data → Export backup (JSON)**. Your data lives only in this browser, on this device. Clearing browsing data wipes it, and a backup is the only way back. It takes eight seconds.

Watching, not running the game?

Switch the tracking pill in the top bar to a single player. The scoreboard, the clock and the substitution strip disappear, and a court/bench toggle becomes the clock — so the minutes you record are the minutes your child actually played. Put in the two final scores after the game and the season record still builds itself.

Keyboard, if you are on a laptop

1 2 3	Pick the player	Z X C	Assist / steal / block
Q W	1PT make / miss	D F	Defensive / offensive rebound
E R	2PT make / miss	V B	Turnover / foul
A S	Free throw make / miss	Space / Bksp	Clock / undo

What the app already knows about 3x3

Rule	Default	Change it in
Inside the arc	1 point	—
From the arc (6.75 m)	2 points	—
Free throw	1 point	—
Game length	One 10-minute period	Settings → 3x3 rules
Target score	First to 21	Settings → 3x3 rules
Overtime	First to +2, no clock	Settings → 3x3 rules
Shot clock	12 seconds	Settings → 3x3 rules
Team fouls	7th → 2 free throws · 10th → 2 + the ball	Settings → 3x3 rules
Fouling out	Nobody does — that is the 3x3 rule	Settings → Fouls

The shot clock resets to 12 automatically on a made basket, a made free throw, a rebound at **either** end, a steal or a turnover. Tap the shot-clock box to force it back at any other time.

Pick the depth you can keep up with

Mode	Buttons	Use it when
Basic	9	You are also coaching, or handing the phone to a parent. Points, rebounds, assists, fouls.
Full	13	Somebody is on the bench doing nothing else. The complete box score.
Pro	13	That person is fast. Adds shot locations and the Advanced tab — one extra tap per shot.
