GARDEN / PLAN THE WORK

Garden Planting & Growth Journal

Turn a growing season into useful observations, not guesswork.

SEASON / YEAR

LOCATION / BED CODE

01

WHAT YOU PLANTED

Crop, variety, seed source, sowing method and planting date.

02

BED CONDITIONS

Sun exposure, observed soil conditions and any known constraints.

03

CARE PLAN

Watering, mulching and maintenance based on local conditions.

04

WHAT YOU ARE TESTING

Write one observable question, such as the effect of spacing.

GARDEN / TRACK YOUR RECORDS

Garden Planting & Growth Journal

Turn a growing season into useful observations, not guesswork.

PERIOD / PROJECT

DATE REVIEWED

DATE	CROP / BED	ACTION / WEATHER	OBSERVED	NEXT REVIEW

FIRST HARVEST DATE

END-OF-SEASON NOTES

GARDEN / REVIEW + QUICK START

Garden Planting & Growth Journal

Turn a growing season into useful observations, not guesswork.

01

WRITE A BASELINE

Record actual planting date and condition before comparing outcomes.

02

KEEP MEASURES CONSISTENT

Use the same units and observation method each time.

03

LEARN FROM THE RESULT

Compare what you planned with what actually happened, without assuming causation.

WORKED EXAMPLE / NOT REAL PERSONAL DATA

Apr 14: sowed lettuce in Bed B. May 1: measured leaf height; recorded rain since last check.

Compare again May 8.

WHAT WILL YOU DO DIFFERENTLY NEXT TIME?

IMPORTANT SCOPE

Follow local growing conditions, plant safety and product instructions; this is a garden diary, not agricultural certification.
